

Coupons for More than One

EXAMPLE

Bob has a coupon that offers a savings of \$1.00 on any 3 frozen pizzas. Each pizza is marked \$4.29. How much will the 3 pizzas cost with the coupon?

Step 1 Multiply

$$\begin{array}{r} \$ 4.29 \\ \times \quad 3 \\ \hline \$12.87 \end{array}$$

Step 2 Subtract

$$\begin{array}{r} \$12.87 \\ - 1.00 \\ \hline \$11.87 \end{array}$$

The pizzas will cost \$11.87.

Directions For each set of items, find the cost when a coupon is used.
