

Lunch Assignment

calculate the cost of a packed lunch that includes:

1. main item
2. “sidecar”
3. fruit
4. vegetable
5. beverage
6. dessert

Organize your report showing the cost of a packed lunch so that the breakdown in cost for each item is clear (including itemization, e.g. PBJ sandwich components: bread, peanut butter, and jelly). It should be organized so that it is easy to check your arithmetic.

You may substitute items for any of the above, with prior approval from Mister Petto.

Anyone who emails his or her report to misterp@mathlore.net will receive a 10% scoring bonus.

The assignment is due Friday, September 25.
