

The \$1550 Project

Your Great Uncle Oz has generously offered to help you furnish your new apartment. He is willing to give you up to \$1550 USD toward furnishings and appliances. You must give him a list with accurate prices (including tax) detailing your desires. He has also stipulated that you must provide two different sources documenting the price of each item. The prices can be different, and you don't have to choose the lower price (if you think there is some advantage to the higher-priced item.) But you must have **two** prices for each item.

The three students who come closest to spending his \$1550 offer, *without exceeding it*, will receive a 15% scoring bonus.
