

Division Practice

EXAMPLE

Often division results in a zero in the quotient. Be certain to notice each division and place a zero correctly.

$$\begin{array}{r} 109 \\ 17 \overline{)1853} \\ \underline{17} \\ 15 \\ \underline{0} \\ 153 \\ \underline{153} \\ 0 \end{array}$$

← Remember to place this 0 in the problem and in the answer.

Directions Divide.

1. $7 \overline{)2,128}$

2. $10 \overline{)11,090}$

3. $8 \overline{)8,272}$

4. $5 \overline{)2,540}$

5. $6 \overline{)6,198}$

6. $4 \overline{)32,364}$

7. $12 \overline{)7,440}$

8. $15 \overline{)30,750}$

9. $21 \overline{)9,240}$

10. $26 \overline{)2,678}$

11. $43 \overline{)44,290}$

12. $18 \overline{)14,526}$

13. $52 \overline{)6,240}$

14. $61 \overline{)12,322}$

15. $19 \overline{)2,090}$
